Consent for Recording

To ensure that we accurately capture your insights and prepare an interview transcript for our project documentation, we would like to ask for your permission to **audio record** the interview.

- The recording will be used **only for creating a transcript** for our Requirements Engineering project.
- The recording will **not be shared publicly** or used for any other purpose.
- If you prefer not to be recorded, we will instead take written notes during the interview.

General Questions

1. What are the most common mental health challenges that students seek help for?
2. Are there particular periods during the semester (e.g., exam periods) when students experience significantly more stress or anxiety?
3. From your experience, what are the biggest barriers preventing students from seeking professional psychological support?

Current Support Services

4. What types of support or counseling services are currently available for students?
5. Are there aspects of current services that could be improved to better support students?
6. Do students often need immediate support outside counseling hours?

AI-Based Mental Health Support

7. What is your opinion on using AI as an additional mental health support tool for students?
8. In which situations do you think an AI chatbot could be helpful?
9. Are there situations where AI should not provide support and instead encourage students to contact a professional counselor immediately?
10. What concerns would you have regarding an AI mental health application?

Desired Features

11. Which features would you consider most valuable in a student mental health app?

Examples:

- Daily mood check-ins
- Stress tracking
- AI chatbot
- Personalized coping strategies
- Mindfulness exercises
- Exam preparation support
- Emergency contact information

12. What information or resources should always be available within the application?

13. How could the app encourage students to build healthy habits without becoming overwhelming?

Privacy & Ethics

14. How important is data privacy for students using a mental health application?

15. What measures would increase students' trust in such an application?

16. Should students have complete control over what personal information is stored or shared?

Final Questions

17. If you could design the ideal mental health support app for students, what would be its most important feature?

18. Is there anything we have not asked that you believe is important for us to consider during the development of this application?
